

We agree to the circulation of the draft as a DIS in accordance with 2.6.1 of the part of the ISO/IEC Directives

With comments:

1. For part 1 (L/S2) and part 2 (L/S10), regarding sample size : there is the description in page 5 in part 1 and in page 4 in part 2, "Obtain a representative laboratory sample of at least 2kg(dry matter) of the material" .

In the doc of ISO/TC 190/WG 6 N0068, in page 2, it was agreed that "deviation is possible with mention in test report". We propose that in the coming text of DIS of 21268 both part 1 and 2 to describe accordingly with respect to the sample size.

2. For both part 1 and 2, in page 11 of Annex A, there is the description " In figure 1 examples of constituents reaching stable conditions quickly and examples of constituents not reaching stable conditions after 150 hrs are shown"

There is no figure 1 attached in the text of the CD. We propose the adequate figure showing the above description to be attached in the Annex A.
